River Stone

Evergreen landscape stone provides a pest-free and long-lasting alternative to traditional organic mulching materials. Our stone doesn't attract ants or bugs around foundations, eliminating the need for pesticide spraying. An excellent drainage medium, it will greatly reduce moisture problems and can enhance erosion control for sloping contours. When applied over black felt paper, it's an excellent weed deterrent. Best of all, it retains its color and crisp look year after year, eliminating the cost of seasonal application of organic mulch and making it maintenance-free.

Natural stone mulch accents flower beds and can be used around pools, decks, paths, walkways or fences.

Evergreen landscape stone is available in 1/2 cubic foot bags. The following chart will help you estimate the amount of stone you will need per square foot for your landscape project. This is only a guide, the amount needed will depend on the thickness applied.

Area to Cover	Square Feet	BAGS NEEDED			
		2"	3"	4"	5"
5 x 10	50	16	25	33	42
5 x 20	100	33	50	66	83
10 x 10	100	33	50	66	83
10 x 20	200	66	100	133	166
